

Your IndianaMap

The **IndianaMap** is a single statewide map for Indiana. It includes the information people need most in a format that is accessible to both mapping experts and the general public.

The Indiana Geographic Information Council has championed the creation of the IndianaMap by gaining consensus on data needs, building the map, educating people on its use, and making it widely available.

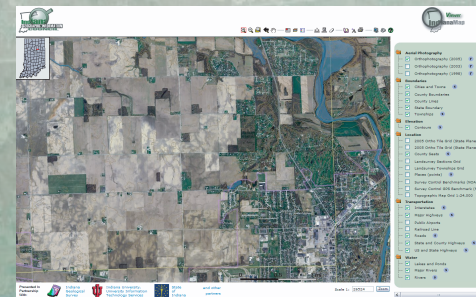

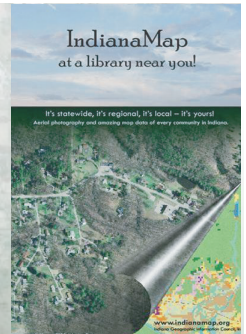

Indiana needs a single, accurate, high-quality, digital map because...

1. Digital maps should be made once and paid for once ☐
2. Better informed decision-makers make better decisions ☐
3. Emergency responders need maps that span city and county lines ☐
4. Pooling resources saves taxpayer dollars
5. Access to information empowers citizens

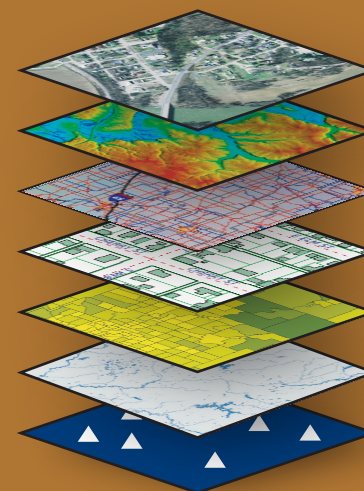

IndianaMap Projects

- Putting the IndianaMap on disk in over 100 libraries around the state
- Pioneering the \$7.3M 2005 statewide aerial photography project
- Working with government, private industry and the public to develop "Framework Data," the map layers of most use to the most people

- Developing online tools like the self-reporting GIS inventory and data library
- Building an online version of the IndianaMap
- Conducting outreach through seminars, forums and exhibits

IndianaMap Layers

- Aerial Photography
- Elevation
- Roads & Addresses
- Parcels & Ownership
- Boundaries
- Waters
- Geodetic Control
